ACER is central to the integration and well-functioning of the EU's electricity and natural gas markets.

The purpose of ACER is to assist National Regulatory Authorities (“NRAs”) in exercising, at Union level, the regulatory tasks that they perform in the Member States and, where necessary, to coordinate their action, and to mediate and settle disagreements between them. ACER shall also contribute to the establishment of high-quality common regulatory and supervisory practices, thus contributing to the consistent, efficient and effective application of Union law in order to achieve the Union's climate and energy goals.

In this respect, ACER:

- a) Complements and coordinates the work of NRAs;
- b) Participates in the development of European network rules;
- c) Takes, under certain conditions, binding individual decisions on terms and conditions for access and operational security for cross-border infrastructure, on cross-border cost allocation for Projects of Common Interest and on terms and conditions or methodologies for the implementation of network codes;

The main areas on which ACER's activities focus are:

- Supporting European market integration: this is mainly done through the development of common network and market rules, as well as through the coordination of regional initiatives which are concrete efforts from market participants to work towards greater integration;
- Advising the EU Institutions on trans-European energy infrastructure issues: ACER issues opinions on ten-year network development plans, to ensure that these are in line with priorities set at EU level, and on the draft lists of Projects of Common Interest; and
- Energy market monitoring: ACER has a general mission in terms of market monitoring at the EU level and has, since the end of 2011, a very specific responsibility when it comes to the oversight of wholesale energy trading referred to as surveillance.

With the "Clean Energy for all Europeans" package legislation, additional tasks have been assigned to ACER, including, in particular:

- Approving the all TSOs' proposals for terms and conditions or methodologies to be developed under the Commission Guidelines;
- Approving or amending the new resource adequacy and risk preparedness methodologies to be developed by ENTSO-E; and
